

How Can We Improve
the Absentee Ballot
Experience?
Celine Djomoah

Enforce absentee ballot deadlines through social media, text messages, emails

Offer school course to students on how to vote or implement voter registration programs in community

Print absentee ballots on thicker paper to reduce paper damage that could disqualify ballot

Provide sample ballot in letter with proper tools to fill it out (black/blue pen) or community programs for free pens

Provide sheet detailing mistakes that could cause ballot to be rejected/definitions of hard to understand words

Offer absentee ballot in all languages that user can request

Provide sample ballot in letter with proper tools to fill it out (black/blue pen) or community programs for free pens

I think this is a good solution to pursue because it's easy to mass produce pens and sample ballots are already included in absentee ballots. Also, included the correct tools to fill out the ballot would remove the possibility that a user could fill out the ballot with an inappropriate tool.

Offer absentee ballot in all languages that user can request

I think this is a good solution to pursue because it would make it easier for non-english speakers to understand the ballot instructions
